

Blue Value on the go!

Blue Value support package generates increased reliability

With its all encompassing Blue Value service and support package WP Haton ensures its clients to have continuous, reliable machinery at their disposal.

This client-oriented approach increases the added value of WP Haton's machines. Reducing downtime at bakeries is one of WP Haton's primary objectives.

With Blue Value WP Haton increases efficiency of its machines, lengthens their lifecycles and reduces production costs. Similarly, bakers can also undertake preventative maintenance which in turn results in minimal shutdown times and prevents unpleasant surprises. Blue Value raises reliability to an even higher level.
