DecoSeeder[®] HIGH FIVE

1

For who?

Industrial bakeries that wish to seed loaves automatically.

2

Advantages

- Can be used for moulded breads from all types (wheat and rye type)
- Loaves are seeded all around with a max. load of seeds (pre fixed in grams)
- Seeds over the loaf and from the sides
- Complete unit with photo eye detection of the loaf, set seeding quantity, moulding, seed return and final moulding inclusive panning

3

Savings

- Labour : based on a 4000 line approx. € 120.000 per year (based on hourly wages of € 15,00 per hour (4 persons – 1 shift – 5 days working week and 50 weeks)
- No waste of seeds : pre-set quantity of seeds is used only
- Hygiene : shelf life – no manual treatment of the dough
- Process – seeds are rolled in also on the sides and stay on the loaf

4

Features

- Stand-alone unit
- Can be added behind each moulder
- Return of seeds by vacuum pump
- Access of seeds fall on a conveyor for return
- Photo eye detection of seeds
- Seed bed is created for seeding the loaf
- Different type of seeds can be used

5

Products
