

## **BIP 72** Industrial Proofer

## This industrial intermediate dough proofer is suitable for a wide variety of dough types.

Its modular structure allows for a high degree of customization. The BIP 72 is a proven concept due to many years of experience.

Dough Friendly Compan

## WP Haton the leading brand in dough processing since 1949

WP Haton produces the most advanced and best bread make-up machines in the world contributing to high weight accuracy, excellent structure and most friendly and careful handling of the dough without compromising on high speed, consistency and constant quality on every piece of the dough piece produced.

- Automated dough processing systems for virtually all types of bread
- Tailormade line concepts in dough processing equipment
- Unique system of modularization
- BreadLab: the experience center where bakers from all over the world can test our equipment with their own ingredients

# **BIP 72** Industrial Proofer

#### Highlights

- Industrial proofer with blue, metal detectable cups
- Applicable for a wide range of weights
- Unique pallet infeed for high capacity, up to 9,000 pcs/h
- Modular frame made of stainless steel
- Dust flour free process possible
- Removable and washable synthetic dough pockets
- UV lamps to prevent mould forming
- High level of customization

Dough Friendly Company

## **BIP 72**

The BIP 72 is an intermediate proofer suitable to process all types of wheat and mixed rye dough. The ultraviolet lamps prevent mould forming on the inside of the proofer, and the transparent plexiglass windows allow for visual inspection. Thanks to the modular concept this proofer can be customized to accommodate the customer's requirements. The BIP 72 is a robustly designed proofer with proven quality for many years.

BIP 72 dough proofers are developed to obtain a fully automatic resting/proofing process between rounder and moulder.

#### **Specifications**

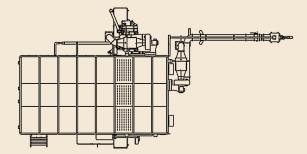

- Weight range 200 1800 gr
- Stainless steel frame and swings
- Blue pockets round polyethylene, removable, washable, Ø 190 mm
- Proofer runs continuously
- Teflon coated transfer box for dough transfer between pockets without sticking problems
- Turning device, proofer trays and panels in stainless steel
- Parts in contact with dough are Teflon coated
- Chain with chain guides in stainless steel
- Exhaust fan
- UV lamps
